

## Live FM Environment Policy

---

Live FM believes that proper care and use of environmental resources is the responsibility of every individual. Live FM promotes care of the environment through its operations.

The key points of its strategy to achieve this are:

- Minimise waste by evaluating operations and ensuring they are as efficient as possible and recycling where possible.
- Minimise toxic emissions through the selection and use of its Vehicles.
- The basis of our considerations is ecological sustainability, particularly through avoidance of pollution of land, air, or water. Live FM has a risk management procedure in place to reduce any potential environmental risks.
